Gutter system

Struga

gutter system

Steel gutters — solid investment

Steel is the most important construction material in the world. Made of steel Struga rain gutter system ensures durable use for dozens of years.

When used to supplement a roof system, it is matched well to decking while maintaining full functionality throughout the complete period of use.

System rain gutter system
Opportunities

Material above all

Struga gutter system is manufactured from dedicated Scandinavian steel sheet SSAB GreenCoat RWS.
Depending on the element, the sheet thickness is 0.6–1.25 mm.

Can be installed in winter

Steel is a very durable material with minimum thermal expansion. The asselmly of Struga gutter system at negative temperatures is not a challenge.

Warranty for paint and functions

Struga rain gutter system is covered by automatic warranty for functionality for 30 years and paint for 15 years.

Solid hooks MAX

Hooks MAX for barge board are made of painted sheet metal, 1.25 mm thick. With extremely solid design for supporting gutter temporarily filled with ice or snow.

Painted on both sides

The gutter system is finished with thick, double layer 35 µm paint which ensures aesthetically pleasing design and functionality for dozens of years.

13 colours

You can find matching colour for your decking in the broad range of colours which is available at all times.

Even more durable

Stiffeners for gutter joints and reinforcements for gutters for drip edge are available to increase strength of the horizontal part of the system.

Aesthetics

Stop ends for downspout in the form of longitudinal joint hidden inside the pipe, side connecting elbows, professionally pressed running outlets or hooks to barge board are some of the examples of our focus on the quality of manufacturing.

Easy and quick asselmly

Struga rain gutter system is made up by complete selection of accessories which create perfect colmination for quick and easy installation. Individual elements show high precision of manufacturing and dimensional accuracy to ensure perfect match.

Material

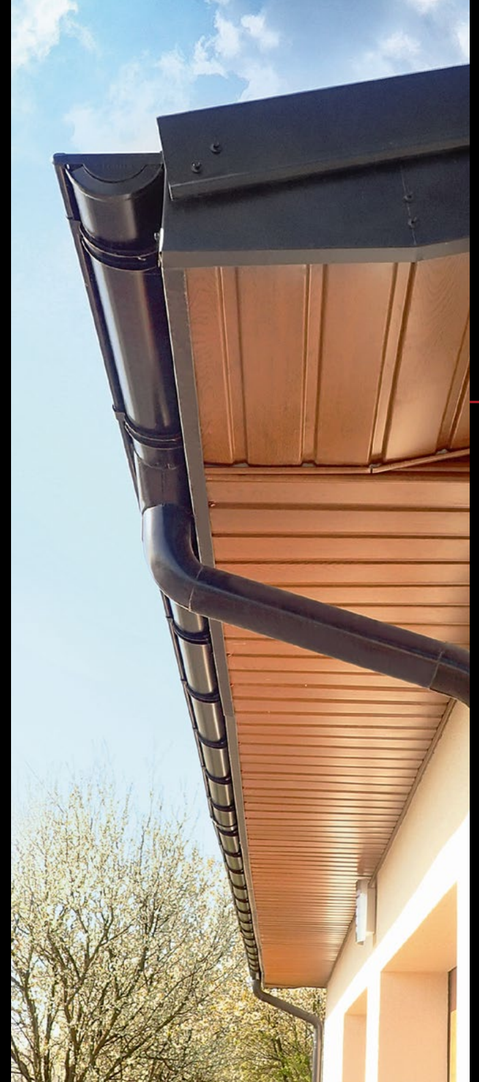
Steel — solid basis for products

Scandinavian steel made by SSAB: hot-dip galvanized steel core painted with undercoat on both sides and coated with a 35 µm layer of GreenCoat RWS.

Struga rain gutter system is available in three sizes:

- 125/90 — Scandinavian type gutter, roof planes 75 - 150 m^2
- 135/90 — deep gutter, roof planes 125 - 250 m^2
- 150/100 — wide gutter, semi-industrial use roof planes 175 - 350 m^2

! The available range of roof plane areas involves using one or two edge downspouts.



Which colour will you select for your roof?

Struga system is available in thirteen colours which enables selecting just the right colour to match the colour of roof plane or to create an outline between the roof and facade.
